

Experience

May 2025 - Present **Senior Fullstack Engineer,**
CLICKUP

- Worked on ClickUp's import platform, supporting complex customer data migrations from external productivity and project management tools.
- Built and maintained TypeScript/NestJS backend services for import workflows involving tasks, comments, attachments, subtasks, and project mappings.
- Contributed to Temporal-based workflows and used Angular, Datadog, Tilt, and Harness across development, debugging, and production rollout processes.
- Leveraged AI-assisted development tools such as Cursor and Claude Code to accelerate codebase exploration, implementation, and refactoring.

Aug. 2024 - Feb. 2025 **Principal Engineer,**
CIRCA

Provided leadership with hands-on programming using modern frameworks (React, NestJS, Next.js) and robust databases (PostgreSQL, Redis), leveraging AWS and Railway for cloud infrastructure to deliver scalable solutions:

- **Leadership & Strategy:**
 - Managed and mentored a cross-functional team, planned sprints, and established best practices through code reviews.
 - Collaborated closely with the lead designer to define application vision, version scopes, and release strategies.
- **Technical Contributions:**
 - Designed and developed a large-scale search platform processing millions of records, optimizing SQL queries, and managing database migrations.
 - Designed and implemented an AI-powered LCA assistant with features including AI-driven text and image analysis, interactive Q&A, WebSocket-based real-time chat, and chunked file upload support.
 - Leveraged AWS services (S3, Bedrock) and Railway for cloud infrastructure and deployment.

Jan. 2023 - Aug. 2024 **Technical Lead,**
BEESAFE

Combined leadership with hands-on technical contributions, leveraging a modern tech stack—Express, NestJS, and React for development; PostgreSQL and Redis for data management; and Azure with Kubernetes for scalable deployment—to architect robust solutions:

- **Technical Architecture & Cross-Company Integration:**
 - Designed scalable and efficient architectures for core company services.
 - Provided technical support and mentorship to full-stack developers, improving team skills and project outcomes.
 - Led an AI-based data scraping project.
 - Designed API contracts with internal teams and external partners to ensure seamless service integration.
 - Built and maintained payment processing systems, handling both incoming and outgoing transactions, including installment plans and automated financial reporting.
- **Project Leadership:**
 - Defined technical roadmaps, driving code refactoring, new features, and architectural improvements in collaboration with company leadership and other team leads.
 - Collaborated with the DevOps team to optimize deployments using Kubernetes and Azure, ensuring robust performance of services across both development and production environments.
 - Collaborated with representatives from various Compensa subsidiaries to standardize solutions and integrate best practices across companies.

Mar. 2020 - **Full Stack Developer,**

Feb. 2023 BEESAFE

Developed an insurance application from scratch using a microservice architecture:

- Managed integration with external services:
 - Evaluated and compared different vendors by testing and analyzing their APIs and documentation to select optimal solutions.
 - Collaborated in designing the integration architecture to ensure effective service communication.
- Developed and maintained a microservice application:
 - Implemented services using Node.js, TypeScript, Express.js, and RabbitMQ; managed databases with PostgreSQL and Redis; authored comprehensive documentation including architectural diagrams; conducted testing with Jest.
 - Deployed microservices to a Kubernetes cluster and worked on CI/CD pipelines using GitHub Actions; performed log analysis with Grafana and Loki.
- Assisted in the recruitment and onboarding of new team members, ensuring a smooth transition and integration into the development team.

Dec. 2018 - **Software Engineer,**

Feb. 2020 SAMSUNG R&D

Engaged in R&D, prototyping, and implementing new ideas for the following projects:

- Developed a WYSIWYG tool for building applications compatible with mobile and watch devices, utilizing JavaScript, Node.js, and the VS Code Extensions API.
- Contributed to the Tizen Advanced UI framework, including:
 - Developing sample projects and tools for creating applications that run on Samsung devices, employing JavaScript and internal libraries.

July 2017 - **JavaScript Developer,**

Nov. 2018 10CLOUDS

- Led frontend development for Angular 2+ applications with interactive D3.js charts and contributed to multiple web applications using Angular, React, and Redux.

Jun. 2016 – **Programmer,**

May 2017 ERNST & YOUNG

- Developed multiple web applications for data analysis, document validation, and benchmarking using Angular 2, React, TypeScript, Node.js, and PostgreSQL.
- Implemented a Bitcoin traffic tracker, a search tool leveraging Elasticsearch, and a news feed application with a dashboard and user authorization.

May 2016 – **Programmer / Web Developer,**

May 2016 LIONBRIDGE TECHNOLOGIES, INC., WARSAW

- Developed internal web apps using JavaScript and Angular and a standalone desktop app in Ruby.
- Co-conducted Responsive Web Design (RWD) workshops at the InfoMEET conference.

Aug. 2014 – **Junior Programmer / Web Developer,**

Apr. 2016 LIONBRIDGE TECHNOLOGIES, INC., WARSAW

Aug. 2014 – **Web Developer,**

May 2016 CISCO SYSTEMS, INC., WARSAW

- Developed and maintained websites for Cisco Systems targeting the EMEA markets.

Education

2017-2018 **Mobile Web Specialist**, *Google Developer Challenge Scholarship.*

2016–present **Computer Science**, *BA, part-time, Polish-Japanese Academy of Information Technology*

2013–2015 **Computer Science**, *BA, Faculty of Mathematics, Informatics and Mechanics*
University of Warsaw

2009–2012 **Mathematics**, *BA, Faculty of Mathematics, Informatics and Mechanics*
University of Warsaw

Technical Skills

JavaScript, TypeScript (Node.js, React, React Native, Next.js, NestJS, Express, D3.js, WebSockets); SQL (PostgreSQL, Redis); Git, Bash; Docker, Kubernetes, GitHub Actions; Azure, AWS (Bedrock, S3), Railway; Grafana, Loki, Prometheus; RabbitMQ, Elasticsearch; AI integration (LLM, text/image analysis), Data scraping; Jest

■ Languages

English Advanced (C1)

Polish Native

I hereby consent to the processing of my personal data included in my application for the purposes of the recruitment process, in accordance with the General Data Protection Regulation (EU) 2016/679 (GDPR).
